SUMMARY

Software Engineer with 1.5 years of experience skilled in Java, Spring Boot, Kafka, and AWS, with a track record of building scalable, event-driven systems and shipping production-grade features across payments and consumer platforms at scale.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++.
- **Frameworks & Technologies:** Spring Boot, Spring MVC, Hibernate, REST APIs, Microservices, Kafka.
- **Databases & Caching:** MySQL, Redis.
- **AWS & Cloud:** CloudWatch, EC2, S3, SQS, API Gateway, Lambda, ECS, CodeDeploy.
- **DevOps & Tools:** CI/CD, Jenkins, Maven, Git, Bitbucket, Datadog APM, Docker, Kubernetes.
- **Core CS:** Data Structures & Algorithms, OOP, Multithreading, Distributed Systems, System Design.
- **Testing & Practices:** Unit & Integration Testing, JUnit, Mockito, Code Reviews, Agile, Scrum.

EXPERIENCE

- **DealShare (Ecommerce Unicorn)** Bangalore, India
Backend Software Development Engineer Jul 2025 – Present
 - Engineered and shipped an **agentic AI-powered PR review assistant** embedded in the team's **Git workflow**, built with **Bitbucket** and **Claude APIs** and evolved into a multi-step **agentic loop with autonomous tool use** that enforces **code quality gates**, replacing CodeRabbit (\$24/developer/month) and cutting tooling costs by approximately **70%**, while personally conducting **code reviews** for teammates.
 - Built **pos-adapter-service**, a **microservice** powering **29 retail stores**, with an idempotency framework for **exactly-once order processing**, **offline batch reconciliation**, and **webhook pipelines** ingesting third-party sales and refunds into the OMS, maintaining full **API documentation**.
 - Delivered a **platform-wide decimal precision migration** across **5 services** with **zero downtime**, redesigning refund logic per **SOLID principles** for financial accuracy.
 - Mitigated large-scale **OTP abuse during DDoS attacks** on public authentication APIs by implementing internal validation and request-filtering mechanisms, curbing fraudulent traffic and saving close to **\$5K/month** in third-party SMS vendor (Kaleyra) costs.
 - Built **event-driven integrations** tracking **15+ lifecycle events** via **Kafka** to **CleverTap**, **AppsFlyer**, and **Firebase**, powering real-time analytics and retargeting.
 - Led end-to-end development of the **cart page** and **payment flow**, collaborating **cross-functionally** with Product, QA, and DevOps in **Agile sprints** to deliver the **Lowest Price Challenge** campaign, shipping releases via **Jenkins CI/CD pipelines** and **AWS CodeDeploy**.
 - Improved observability and **monitoring** with **Datadog APM**, **CloudWatch**, and **MCP-based tooling**, enhancing **troubleshooting** and **performance debugging** by instrumenting custom metrics for faster **root cause analysis** of production issues.
- **DealShare** Bangalore, India
Software Development Intern (Backend) Jan 2025 – Jun 2025
 - Integrated **Keycloak SSO (OAuth2/JWT)** with multiple internal services via **Java**, **Spring Boot**, and **REST APIs**, enforcing **100% authenticated, role-based access** on previously unsecured internal panels.
 - Developed internal refund initiation and support panel tooling that reduced manual effort on routine support workflows, enabling the team to focus on complex customer escalations.
- **Amazon ML Summer School 2023** Sep 2023 – Oct 2023
Mentee
 - Selected as one of about **3,000 participants from 60,000+ applicants** for Amazon's **ML Summer School 2023**, a competitive, invite-only program for top engineering students.

EDUCATION

- **PES University** Bangalore, India
Bachelor of Technology in Computer Science; GPA 8.43 2021 – 2025
